

ProxKey™ II

Proximity Keyfob

The RF-programmable ProxKey™ II proximity keyfob incorporates proximity technology into a convenient device approximately the size of an automotive key.

Benefits

- OEMs, distributors and dealers using HID's ProxProgrammer™ can ship custom encoded keyfobs to their customers from their own inventory.
- Smaller order quantities, special coding and overnight delivery are now possible with the ProxKey II keyfob and ProxProgrammer.
- Offers universal compatibility with all HID proximity readers.
- Provides an external number for easy identification and control.
- Can be placed on a key ring for convenient entry.

ProxKey™ II

Features

Proven, reliable technology

The read range is extremely consistent and is unaffected by body shielding or variable environmental conditions, even when close to keys and coins.

Small and convenient

Can be carried with keys in pocket or handbag.

Cross-reference

A cross-reference list correlating the external card number and the programmed ID number is provided for easy system administration. External numbering matching the encoded numbers is available.

Security

Offers over 137 billion unique codes.

Long life

Passive, no-battery design allows an infinite number of reads.

Durability

Polycarbonate package is resistant to cracking and breaking.

Warranty

Warranted against defects in materials and workmanship for life from date of shipment (see complete warranty policy for details).
